Turns Gymnasium Into a Multi-  
Use Easy to Sanitize Space,  
During **COVID 19** While  
Protecting The Playing Surface

We design, engineer,  
manufacture, and  
provide the installation  
accessories and  
storage racking for  
Gym Floor Covers

## GEORGE MASON PROTECTING THE PLAYING SURFACE AND VISITOR HEALTH

### ➔ Needs Assessment and Quoting

Our Sales Managers coordinated a collaborative design effort with the facilities technicians to provide detailed quotes based on the facilities needs.

Putterman Sales Managers collaborated with the skilled facilities staff on site to verify the accuracy of every measurement. Based on these precise measurements, final changes were made to the shop drawings before they were sent to fabrication.

### ➔ Fabrication

Fabrication for George Mason was kept on a very tight schedule. Following the procedure used during the quoting process of this project, our Fabrication

Team tackled production quickly to deliver this large gym floor cover ahead of expectations. This allowed facility installers to get underway ahead of schedule and we were happy to be on hand to assist!

### ➔ Installation and Accessories

Laying out this floor was fairly straight-forward, for installers. they rolled out the vinyl in place with 6 inch to 1 foot overlap and taped it into place while this is

generally a 2-person job it can be done by one. The tape is a special GFC tape we provide and sell per case we also recommend our a walk-behind tape dispenser (well worth the cost for the amount of labor this saves). The end result is a durable and attractive protected gym floor that can now be used as a multi-functional space.

## AN INSIDERS GUIDE TO GETTING EXACTLY WHAT YOU WANT WHEN ORDERING A GYM FLOOR COVER

By Putterman Athletics

George Mason Gymnasium, a space outfitted with a top quality gym floor cover **designed specifically for the site**. To begin we requested a detailed drawing of the facility. We then created a quote for the gym floor cover, installation accessories and storage racking.

**(Pro Tip)** One of the main issues we discover when quoting facilities is that even though GFC is charged by square foot, **don't fall into the trap of thinking 100' x 100' equals 10,000 square feet** and use that for your quote because in the above example you will actually need 110' x 100', or 11,000 SF in order to complete the job when you account for the losses due to overlap!

**(Pro Tip):** We've helped a lot of facilities who in situations where they needed for example 88' x 100' of Gym Floor Cover our competitors would then come in and offer 1 less roll and a smaller rack and not quite covering the entire area. **While the price was lower it wasn't what the facility needed or asked for.** Conversely some facilities have a tighter budget and don't mind sacrificing some coverage for a lower cost. We've learned to ask the facility if covering a couple to few feet less was acceptable in exchange for a substantial reduction in cost. **The key is that it should be up to the facility.**

The Gym Floor Covers and Storage racking of George Mason were designed for full coverage with foot traffic in mind. This gym floor cover features a blend of easy to clean vinyl with a storage system designed to give the space, **flexibility, and durability.** At Putterman Athletics we consider customer service a top priority. That is why we emphasize communicating and putting **the customers needs first** as a critical element in the success of any job. George Mason was no exception.
